HILSAL INDUSTRY

"Trustful Like Pure Water"

ABOUT US

Automation is reinventing the way machines work and the way people lead their lives. At HILSAL we specialize in equipment that makes a real difference. Our automatic water level controller is built on the principle of sustainability. The effort of engineers and technicians come together with a strong business intelligence to positively impact the lives of people.

Through smart automation technology, we bring inventive solutions to the common floor. Our commitment to people-centric technology begins at home. By reinventing resource management, we aim to incorporate automated technology for the convenience of end-users. Our solutions are simple and straightforward. We look for your happiness and that's the truth.

OBJECTIVE

We want to get automation to your doorstep. Here's the goal of our technology:

- **Minimize wastage of resources**
- **Detect water shortages**
- **Reduce the burden on users**
- **Save time and effort**
- **Become more energy efficient**

We created the automatic water level controller as a solution to a common problem faced by people. How do you know when the water level in your well is running low? How can you automatically refill your water supply? Our solution provides an immediate relief to the end user. With automated regeneration time mechanism, the water level controller ensures that you never run out of water. Additionally, the smart design is built for minimum power output and improved resource management. We care about you and our happiness is your comfort. Whether for your home or commercial complex, you can benefit from our unique value proposition.

OUR VISION

We strongly believe that the responsibility towards Nature begins at home. Our innovative solutions are designed to incorporate sustainability at every level. We aim to inspire sustainable living through smart technology.

CORE VALUES

HILSAL is built on the trust of consumers. Our commitment to holistic development begins at home. By enabling access to smart technology solutions, we are a derivative of the end-consumer's satisfaction.

Our core values are > Integrity > Transparency > Commitment > Service

STRATEGISING THE PATH FORWARD

In its infancy, our product development and execution was a learning experience that transformed our goals into reality. We developed a cutting-edge solution to a major problem faced by citizens. As our technology aims to harness the power of sustainability through automation, we are driven by the customer sentiment. We are on the path to enabling people-centric technologies at a large scale.

Our strategic development, deployment and installation of world-class products are reinvented with each happy customer. Just like how we want you to experience the convenience and ease of access to technology, we also aim to experience the rewards of making life easier for people.
